Education

George Mason University | Fairfax, VA

- B.S in Computer Science

Expected: May 2026

Credit Completed: 60, GPA: 3.48/4.0

Experience

Boba Hero LV UP

Oct 2021 – Jan 2022

Retail Cashier

- Managed cash register operations, handling transactions including issuing receipts, refunds, credits, and providing change to customers.
- Collaborated effectively within a two-person team, consistently achieving sales goals by selling a minimum of \$735 worth of products per shift.
- Assisted customers by providing comprehensive product information for over 40 unique products.

Panda Tea House

Dec 2018 – Dec 2019

Barista

- Created over 25 distinct specialty beverages, adhering to stringent quality standards, and ensuring consistency in each hand-crafted drink.
- Provided exceptional customer service by greeting patrons, taking orders, and customizing drinks to their preferences.
- Collaborated with team members in daily tasks, including maintaining cleanliness, stocking supplies, and ensuring efficient operation during peak hours.

Project

Personal Portfolio

- Developed a comprehensive personal portfolio webpage utilizing React and CSS.
- Focused extensively on creating a responsive design that performs across various devices, enhancing user accessibility and experience.
- Prioritized user experience in the design and layout, implementing intuitive navigation and visually appealing elements.

Weather App

- Created a Weather App using HTML, JavaScript, and CSS.
- Integrated a free weather API to fetch real-time weather data based on the specified location's zip code.
- Designed and implemented a 24-hour weather forecast display, delivering users detailed hourly weather updates.

Calculator

- Developed a user-friendly Calculator app using HTML, JavaScript, and CSS.
- Implemented essential functionalities such as addition, subtraction, multiplication, and division for basic arithmetic operations.
- Enhanced user convenience with features like the ability to clear input, change sign, and calculate percentages.

E-commerce (Currently in development)

- Developing an E-commerce website using React and CSS, establishing functional subsections to enhance user experience and engagement.

Technical Skills

Tech Stack

- Java, JavaScript, HTML, CSS, React, C
